DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over 5883687 ("687") in view of US patents 4896947 ("947") and 5249070 ("070").

Per claim 1, 687 teaches a pair of substrates [120,125] a plurality of alignment domains [920,910] and liquid crystal having a twist of less than 90 degrees [see column 14, lines 38-39, a twist of 45 to 70 degrees for optical diffraction efficiency] and the alignment direction of at least one of the alignment domains is different that the alignment direction of at least one other domain [see figure 14, the directors are opposite of each other].

Regarding the over lapping ranges, they are at least obvious. See *In re Wertheim*, 541 F.2d 257. in this case it would be obvious to improve efficiency. Accordingly, it would have been obvious to one of ordinary skill at the time the invention was made.

Regarding the newly added limitations of 70 to 90 degrees and 85 to 90 degrees, 947 and 070 teaches overlapping ranges for improving the contrast. Accordingly, it would have been obvious to one of ordinary skill at the time the invention was made to combine 947/070 with 687.

Art Unit: 2871

Claims 5-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over 687 in view of 947 and 070 as applied to claims 1-4 above and further in view of 6115093 ("093").

Per claims 5-14, 687 teaches the claimed invention except for the alignment direction of the domains including four domains each having a different direction and juxtaposition. However, 093 teaches multi-domains each having different alignment directions for an excellent visual angle and an excellent contrast ratio, see abstract. Accordingly, it would have been obvious to one of ordinary skill at the time the invention was made to combine the four domain alignment of 093 with 687.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Response to Arguments

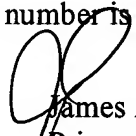

Applicant's arguments present have been considered but are moot in view of the new ground(s) of rejection.
